Career Summary

Computer Science undergraduate (B.E., 2027) with a strong academic record and hands-on experience building API-driven and full-stack applications with Python, FastAPI, and Angular. Sharpened problem-solving through coding contests (1st place in Code Debugging, 2nd place in Code Extreme) and applies engineering practices such as automated testing with pytest and containerization with Docker. Completed internships in web development and data visualization. Seeking to contribute as a Specialist Programmer at Infosys.

Academic Qualification

Bachelor of Engineering (B.E.) – Computer Science And Engineering Expected 2027
Er. Perumal Manimekalai College of Engineering *Aggregate: 9.14/10*

HSC - MPCB 2023
Govt. Hr. Sec. School, Mullainagar *Aggregate: 90.5%*

SSLC 2021
Govt. Hr. Sec. School, Mullainagar

Technical Qualification

Programming Languages: Python, Java, C, JavaScript, TypeScript

Frameworks & Web: FastAPI, Angular, React, HTML5, CSS3

Databases & Backend: REST APIs, MySQL, SQL, SQLAlchemy, Firebase/Firestore, pytest

CS Fundamentals: Object-Oriented Programming, Data Structures, DBMS, Operating Systems

Cloud & Tools: AWS Cloud Architecting Fundamentals, Docker, Git, GitHub, VS Code, Google Colab, Power BI, n8n, Gemini API

Projects

Learning Roadmap API 2026

Description:
Built a RESTful CRUD API using FastAPI, Pydantic, and SQLAlchemy with a modular, layered architecture.

Technologies Used:
Python, FastAPI, Pydantic, SQLAlchemy, pytest, Docker

Key Achievement / Result:

- Structured the codebase into routes, models, schemas, config, and database layers for maintainability.
- Wrote 9 automated tests with pytest and FastAPI TestClient, using dependency injection to run against an isolated test database.
- Applied 12-factor configuration via environment variables/.env and containerized the service with Docker.
- Source: github.com/Bhavi-2005/learning-roadmap-api

NCFSS AI Conference Hub 2026

Description:
Developed and deployed a conference management platform that streamlines participant registration, paper submission, and administrative activities through a centralized web application.

Technologies Used:
React, TypeScript, Firebase, EmailJS

Key Achievement / Result:

- Integrated registration and paper submission workflows into a centralized platform.
- Developed an administrative dashboard to support conference management and streamline administrative operations.
- Live at ncssai-26.vercel.app (source: github.com/Bhavi-2005/ncss-ai26).

SafeRoute – Predicting Road Risks Before They Become Accidents 2026

Description:

Developed a GPS-based web application that warns users when they are approaching high-risk road areas.

Technologies Used:
GPS, Browser APIs, JavaScript, HTML, CSS

Key Achievement / Result:

- Provides alerts approximately 300–400 metres before identified high-risk zones, helping users become aware of potential road hazards in advance.
- Implemented visual alerts, voice notifications, and vibration feedback to provide multiple forms of real-time user feedback.

MindTrack AI 2026

Description:
Built an AI-powered learning tracker using the Gemini API, Angular, and Python. Source: github.com/Bhavi-2005/Learning-Tracker

Technologies Used:
Gemini API, Angular, Python

Internships

Apex Falcon Technologies, Krishnagiri, Tamil Nadu Dec 2025 – Jan 2026

Angular Developer Intern

- Developed and delivered functional features for a live client website, gaining hands-on experience in building and improving web applications.
- Collaborated with team members to understand project requirements, implement features, and improve application functionality.
- Gained practical experience in Angular, REST APIs, and Git while following a structured development workflow.

Infosys Springboard Dec 2025 – Feb 2026

Data Visualization Intern

- Worked as part of a team to develop ElectViz, a data visualization project focused on presenting election data in an interactive and understandable manner.
- Cleaned, analyzed, and transformed datasets using Python, Power BI, and Excel to generate meaningful visual insights.
- Gained practical experience in data preparation, visualization, collaborative development, and presenting analytical results.

Certifications

- AWS Academy Graduate – Cloud Architecting Training – AWS Academy 2026
- Prompt Design in Vertex AI – Google
- Generative AI: Build Real World AI Apps with Gemini & Imagen – Google
- Prompt to Prototype – Google for Startups
- Python Basics – Infosys Springboard
- Power BI: Data Visualization – Infosys Springboard 2026

Achievements

- Second Place – Code Extreme (Symposium) 2026
- First Place – Code Debugging (Symposium) 2026
- NEC 2025 Finalist – National Entrepreneurship Challenge, IIT Bombay 2025
- First Place – CM Trophy, Ball Badminton - District level 2025

Linguistic Abilities

- English
- Tamil
- Telugu
